

SOCIAL ACTION POLICY

Statement of intent

ACCIONA understands that it must take a leading role in contributing to the sustainable development of the communities in the countries where it operates and to help improve the quality of life of the people that live there.

To achieve this goal, ACCIONA seeks to align social collaboration and its business activity, through sustainable medium/long-term projects where it is present, reinforcing the trust between the company and the societies in which it operates and increasing its positive contributions in accordance with the OECD's Guidelines for Multinational Enterprises.

Principles

- **Consistency between business and community needs** – ACCIONA's social activity focuses mainly on issues relating to its business that are in turn essential for development. Therefore, social action is based on the following pillars:

Basic Energy services: the essential goal of this is to enable basic access to electricity using residential photovoltaic systems in isolated rural communities in developing countries where there are no plans for providing other forms of access in the medium or long term.

Basic Water services: to enable access to safe water and sanitation in isolated rural communities, primarily through sustainable self-managed social projects to provide access to safe drinking water, sanitation, and improved cooking facilities.

Promoting Sustainability: foster, promote and disseminate a sustainable culture for the purpose of creating a more responsible and fair society.

Social investment associated with projects: actively contribute to driving and improving the socioeconomic system of the communities where ACCIONA operates.

Health, Education and Culture: the commitment to collaborate with various institutions on the allocation of resources, with the aim of meeting the expectations of their surroundings, thereby benefiting those initiatives that have a greater repercussion on society and that are considered a priority within the scope of health, education and culture.

- **Positive added value** – ACCIONA understands that its contribution should be seen as a contribution to the well-being of society. Its actions, which are not necessarily compensatory nor countervailing, go beyond its business obligations.
- **Medium and long term commitment** – ACCIONA's initiatives for social action and community relations, just as with its business activities, are intended to have a lasting effect in the medium and long term.
- **Collaboration** – ACCIONA cooperates with institutions, NGOs, private companies and others, for the effective development of its social actions. Relationships and partnerships with public and private institutions are intended to combine efforts to support the community.
- **Ethics** – ACCIONA seeks ethics and transparency in its collaborations with entities so that they are not used for anything that goes against the applicable law at any given time.
- **Adaptability** – ACCIONA is committed, in every project, to initiatives that flexibly adapt to the local needs and demands of the communities in which it operates.
- **Employee involvement** – Social action initiatives also represent an opportunity to channel solidarity and commitment concerns. This is why ACCIONA encourages its employees to volunteer.
- **Monitoring measures** – The Company monitors the contributions made and measures their impact.
